■ Museum Education:

It is expected to set up a campus history museum integrating the historic sites at Taiwan Provincial Ilan School of Agriculture and Forestry as well as the cultural relics in the school history museum, thereby extending the history of the University to 400 years ago and allowing students and the public to have a more comprehensive understanding of the historical trajectory of the historic site at Ilan School of Agriculture and Forestry and to have a glimpse of the ancestors of the Kavalan people's life and culture. This can provide knowledge about local historic relics and enhances the understanding of teachers, students, and the general public regarding to Yilan's indigenous culture.
